

DATA DRIVES SUSTAINABILITY!

With **ACRON**, the tool for long-term data archiving, you can get more out of your raw data! Robust analytics and comprehensive reporting provide a reliable foundation for maximum efficiency, security, and transparency of your **consumption and production data**—and we've been delivering these benefits for over 30 years.

acron

Increase your efficiency!

- Optimize your processes with comprehensive data analysis.
- Insightful reports help identify weaknesses and reduce costs.
- Easy operation for plant personnel.

All data at the push of a button!

- Fast and intuitive access to all key data.
- Customizable report layouts and display options to meet your needs.
- Manages consumption and production data.

Reliability you can trust!

- High data security through fail-safe connections (providers) and robust architecture
- Essential features for various industries with audit trail (e.g., DIN ISO 50001, 21 CFR Part 11, ATV M260, A216, TA Abfall, EKVO, etc.)

Seamless. Flexible. Future-proof.

- Seamless integration through open interfaces (e.g., OPC, SQL, CSV) and
- native connections to various SCADA and control systems.
- ACRON is used successfully in almost all industries.

Why ACRON?

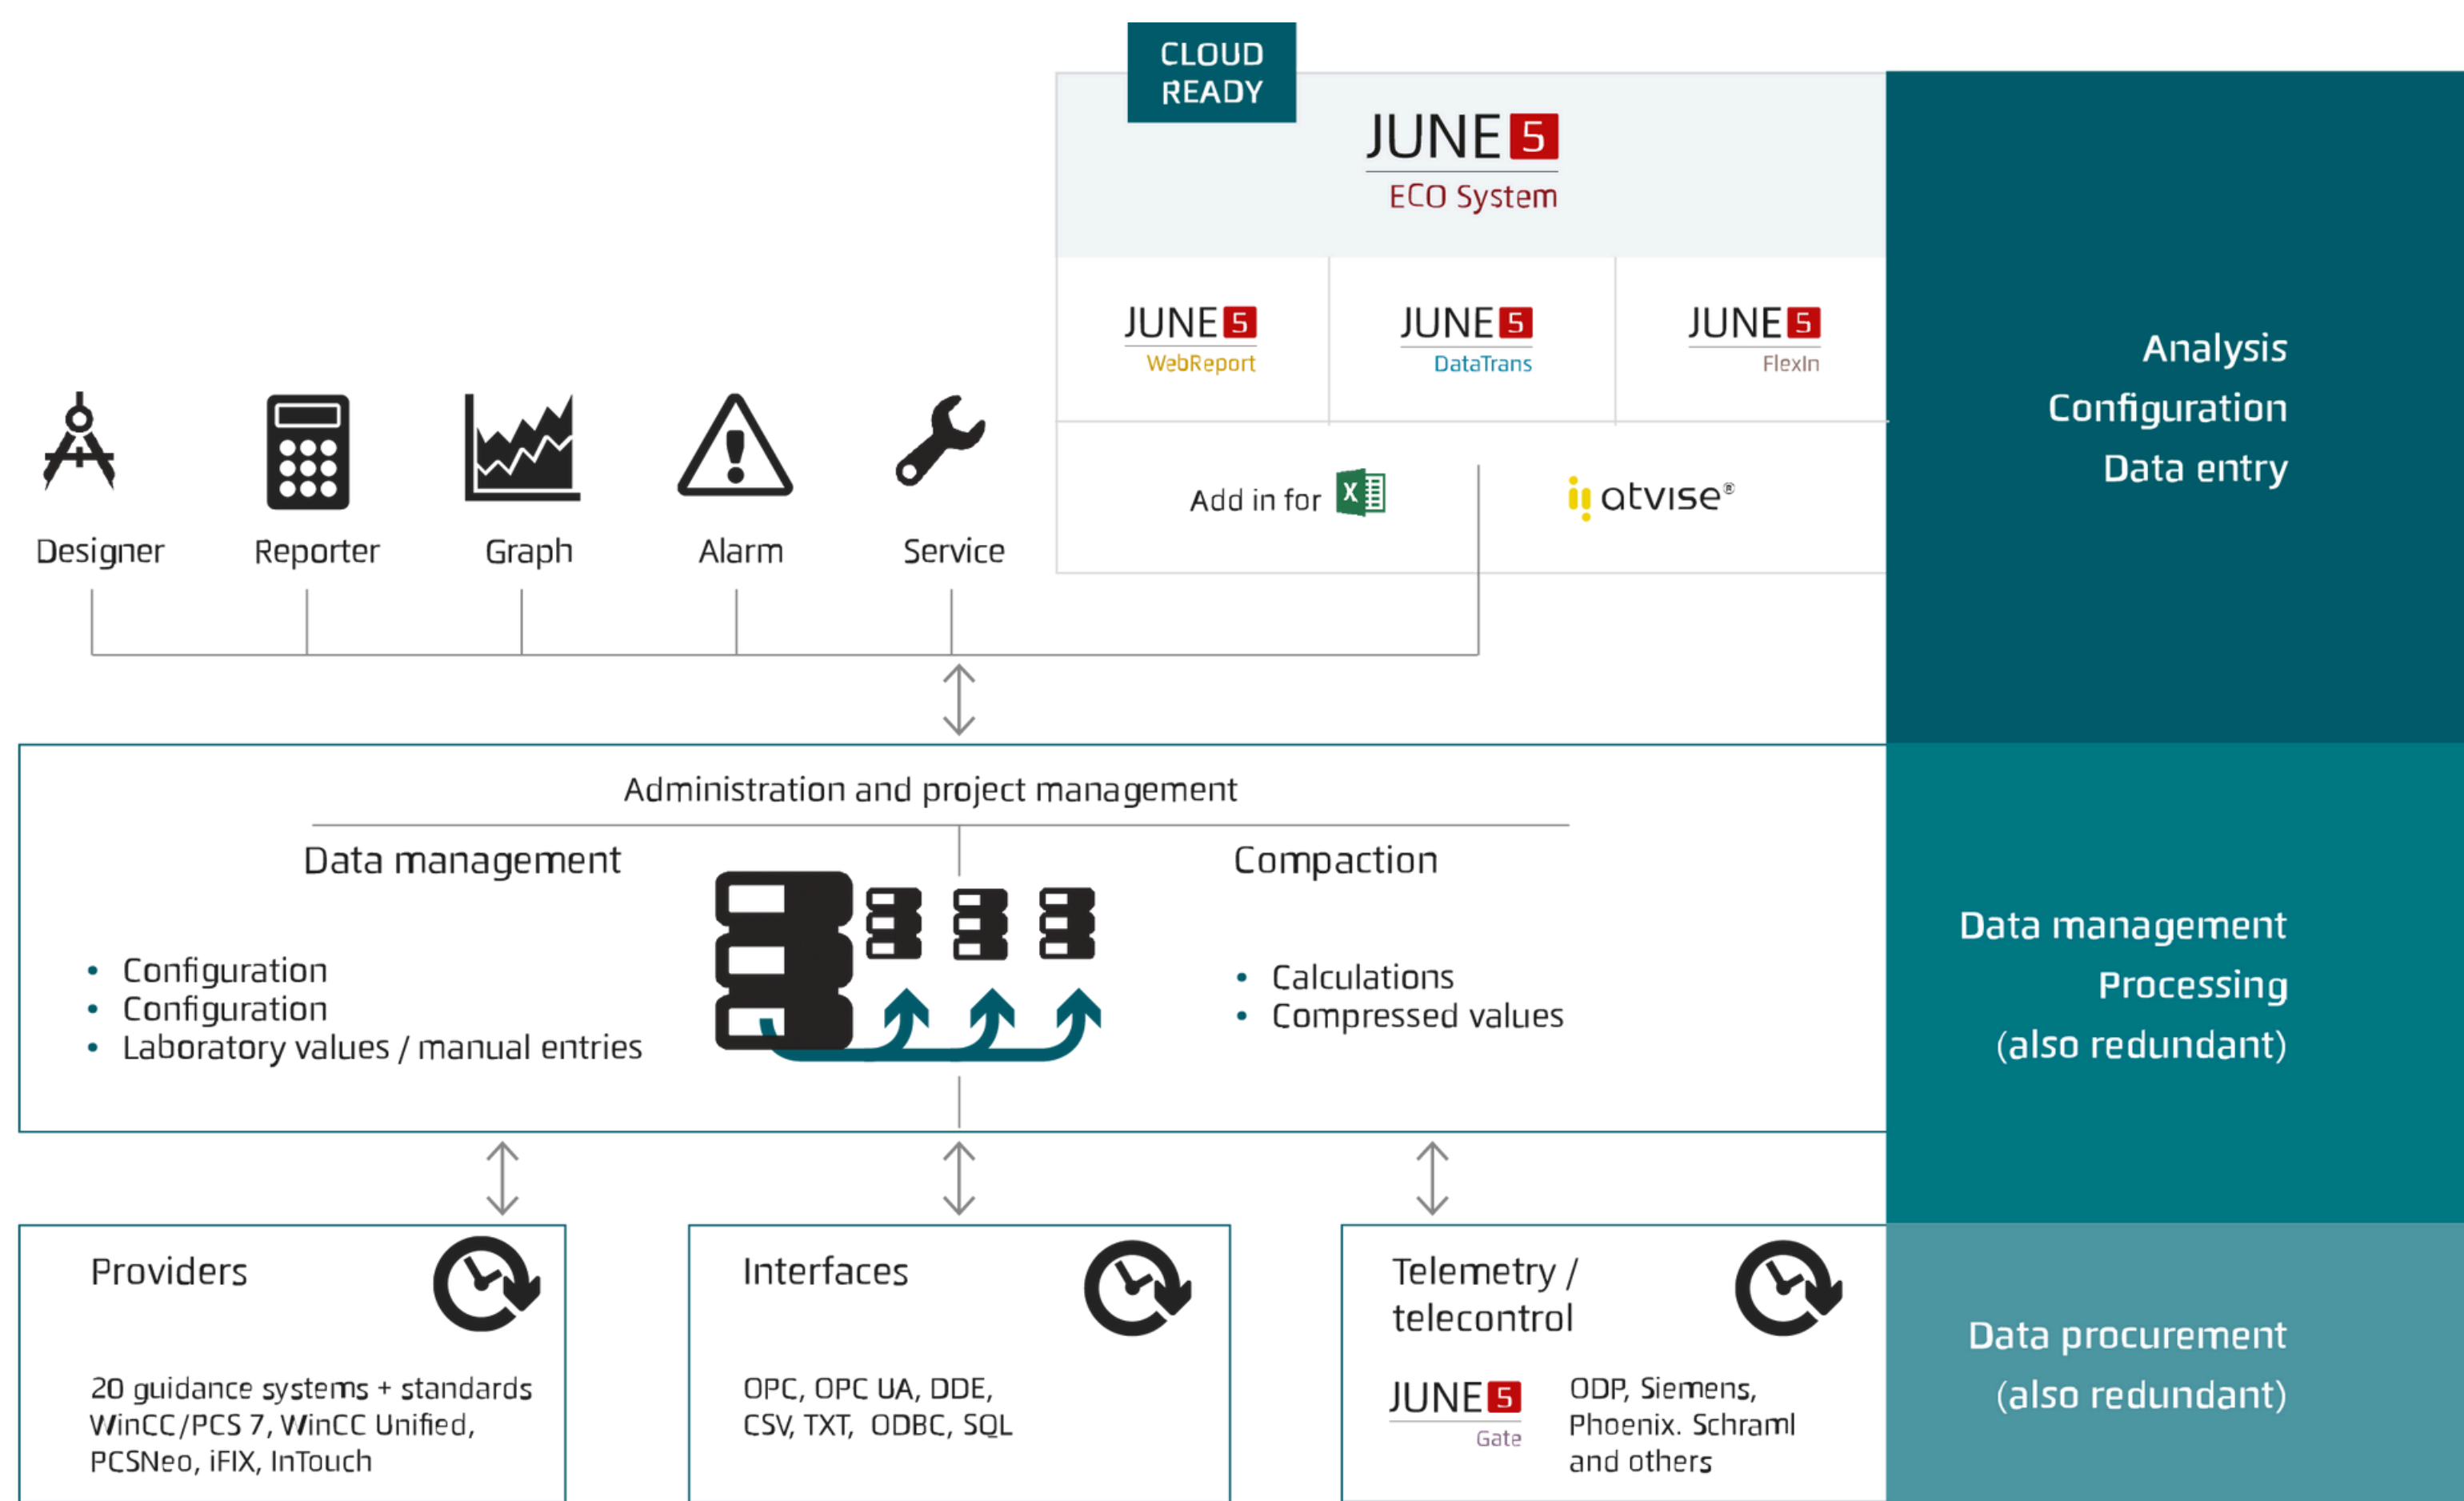

The most convenient way to connect to a wide range of industrial and other data sources.

- **Collect, secure, and analyze data:** Across all systems, reliably and without gaps.
- **Generate meaningful reports:** Perfect for analysis and decision-making.
- **Optimize processes:** Increase productivity and reduce costs.

BUNDLED INFORMATION - THE FOUNDATION FOR EFFICIENCY AND SUCCESS

Technical Highlights:

Data Acquisition and Analysis:

- Aggregation, backup, and archiving of data from multiple systems
- Millisecond-precise data recording (time-based or event-based)

Data Security and Reliability:

- Redundant databases with three-level cache and failure resistance
- Scalable client/server architecture for high performance

Interfaces and Integration:

- Universal connectivity (OPC UA, SQL, CSV, TXT, XML)
- Native integration with systems such as Siemens WinCC, iFIX, InTouch, and ZenOn

Custom industry solution:

1. **Water/Wastewater:** Market leader with over 80% industry share.
2. **Power Generation:** Ideal for biogas plants and hydroelectric power stations.
3. **Waste Incineration:** Rapid setup and increased efficiency.
4. **Pharma & Chemicals:** 100% compliant with 21 CFR Part 11.
5. **Automotive & Engineering:** Optimal data processing for large-scale systems.
6. **And much more.**

Request your **proof of concept** now and test ACRON directly in your own environment—
personal support available upon request!
